DETAILED ACTION

Page 2

Specification

- 1. The disclosure is objected to because of the following informalities:
 - On p.1, In. 15, -- eco should be spelled "echo."
 - On p. 2, In. 11, there should be commas separating CBR and VBR in the list.
 - On p. 2, in. 21, -- so called -- should be "so-called."
 - On p.6, ln. 14, an "=" should be inserted between T and 6 ms. Ln. 14 should read "T = 6 ms". Similarly, ln. 16 should read "nxt = T"; ln. 16-17 should read "n = T/t"; and ln. 31 should read "T1 = T". On p. 7, ln. 2 should read "T = 6 ms".
 Other "=" are missing throughout the Specification. Applicant is suggested to thoroughly review the Specification for similar informalities because these equations are indicative of the Invention.

Appropriate correction is required.

Claim Objections

- 2. Claims 2,4,5 are objected to because of the following informalities:
 - With regard to claim 2, reference numbers such as 6 and 10 for uplink channel and downlink connection respectively, are missing parentheses.
 - With regard to claims 4 and 5, benefits of Invention reflected in the claim
 language are not considered as limitations, such as "so that the waiting time
 there becomes minimal before they are transmitted on the common medium."

Appropriate correction is required.

Claim Rejections - 35 USC § 102

Page 3

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 4. Claims 1,2,6,7 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Yamada (U.S. Pat No. 5,715,285).

With regard to claim 1, Yamada discloses the transmission of data encoding circuit 15 multiplexes data 11a and time information 14a (clock, time slots, as recited in cl. 6) to produce the transmission data 15a, col. 6, ln. 15-21, (packed at the same time, as recited in cl. 1 and 6) where the time information circuit 14 outputs the time information 14a in phase with the network clock signal 18a from the ATM network 17, col. 6, ln. 40-41, (synchronized, as recited in cl. 1; controlled by the same clock, as recited in cl. 6; also physical medium, as recited in cl. 6). Fig. 1. See also col. 6, ln. 11-46.

With regard to claim 2, the ATM network 17 is bi-direction Fig. 1 and can serve as both uplink and downlink.

Application/Control Number: 09/581,759

Art Unit: 2667

With regard to claim 7, the video & sound data 19 is produced from a source (at least one network terminal) and the data encoding circuit 15 produces the transmission data 15a (at least one module)(also generation of ATM cells, as recited in cl. 6 and 7).

Page 4

Allowable Subject Matter

- 5. Claim 3,8-10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
- 6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Blanche Wong whose telephone number is 571-272-3177. The examiner can normally be reached on Monday through Friday, 830am to 530pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Chi H Pham can be reached on 571-272-3179. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
